With the support of

Dear Friends and Colleagues
It is a great pleasure to welcome you to Lisbon for the European Meeting on Laparoscopic and Robotic Urologic Surgery. “Challenges in Laparoscopy and Robotics” has reached the 13th edition and the concept that initiated this adventure is quite alive and shows great potential for the future of Urology.

The comprehensive scientific program will include live laparoscopic and robotic surgeries performed by the world’s most prominent urologic surgeons. In the past meetings, we have witnessed many challenging procedures. It is now time to expand our indications and to look forward to new challenges like the Trans-Douglas RARP, the Navigated Kidney surgery, the Robotic Orthotopic New Bladder, the Cava Thrombus in RCC, the retroperitoneal Robotic Partial Nephrectomy, the Retroperitoneal Lymphadenectomy and Challenging Radical Prostatectomies.

We will have the best international speakers touching various topics like the “Ideal” partial nephrectomy, the current status of robotic cystectomy and diversion, Pudendal nerve release, Update of the Pasadena consensus meeting, Challenges in Robotic Prostatectomy and Immunotherapy for renal and bladder cancer.

We are enthusiastically anticipating an extremely stimulating meeting. Live surgery, State of the art lectures, discussions and thought-provoking debates will take place with the participation of the best urologists in the International arena.

Three monitors will transmit three different surgeries at the same time. Each delegate will be provided with headphones with the possibility to select the preferred moderation.

We are very proud to host this 13th International Meeting in Lisbon in the well known Champalimaud Foundation on the border of the estuary of the Tago river. Lisbon is the perfect city for old antiquities and innovative techniques to convene. We hope that the challenging procedures that you will see will lead the way towards defining the future of Urologic Surgery. See you in Lisbon!

The history of the Champalimaud Foundation begins in the mind of a Portuguese visionary and entrepreneur.

A highly successful industrialist and financier, *António de Sommer Champalimaud* decreed that following his death part of his fortune should have been used to create an international project in the field of biomedicine.

The mission of the Foundation is developing advanced biomedical research programmes and provide clinical care of excellence. Main focus is translating pioneering scientific discoveries into solutions which can improve the quality of life of individuals around the world. By its actions the Foundation Champalimaud strives to be a world leader in scientific and technological innovation with the ultimate aim of preventing, diagnosing and treating disease.

Nowadays the Foundation is still guided by the constant challenge of finding new solutions to humanity's most pressing health problems.

During the entire meeting, attire will be informal.

Climate

June is pleasantly warm in Lisbon and is the perfect time to visit and see all that the city has to offer. The average temperature during the day reaches 20°C or about 60°F, but average highs are 23°C (that's about 74°F). At night the average temperature is around 16°C (about 61°F).

Letter of invitation

Participants requiring a formal letter of invitation from CiLR 2016, to enable them to make their arrangements, should contact the Secretariat. It is understood that such an invitation is intended to help delegates to raise funds or to obtain a Visa and does not imply a commitment from the Congress Organizers to provide any financial support or scheduling of presentations.

Liability

CiLR 2016 Secretariat and Organisers cannot accept liability for personal accidents or loss of or damage to private property of participants and accompanying persons. Participants are advised to take out their own personal travel and health insurance for their trip.
