Laparoscopic Urology has gained wider acceptance and its indications have been gradually extended to substitute those of open surgery. Many operations are now routinely performed via a laparoscopic approach. It is evident, however, that any new surgical approach requires careful consideration, exchange of ideas and experience on an international level.

In the past years, the Vincenzo Pensadoro Foundation has hosted several meetings on laparoscopic surgery with authorities in the field. This time Claude Abbou, Richard Gaston and Jens Uwe Stolzenburg will be our guest Professors.

We are enthusiastically anticipating an extremely interesting and challenging meeting where live surgery, discussions and debates will take place with the participation of the best Urologists in the international arena.

We are extremely proud to host this international meeting in Rome, the perfect city for old antiquities and innovative techniques to meet. We hope that the challenging procedures that you will see in Rome will lead the way and define the near future of Urologic Surgery.
