Challenges in
Laparoscopy & Robotics

Since 2004 - Vincenzo Pansadoro Foundation

Dear Friends and Colleagues,
we are delighted to invite you to Rome for the very special 20th Annual “Challenges in Laparoscopy & Robotics (CILR)”, the world’s pre-eminent live surgery meeting in urology.

This 20-year milestone is a testament to our original concept—highest quality live surgery plus cutting-edge discussions - always the hallmark of CILR.

CILR has grown with the times.

In 2004, we started with “Challenges in Laparoscopy (CIL)”. Ten years later, in 2014, given the robotic advancements, we expanded to “Challenges in Laparoscopy & Robotics (CILR)”.

Today, twenty years later, in 2024, with artificial intelligence (AI) growing dramatically all around us, we expand again to “Challenges in Laparoscopy & Robotics-AI (CILRAI)”.

In these 20 years, 500+ live lap/robotic advanced surgeries have been demonstrated to 9,000+ urologists from all across the world.

CILRAI 2024 comprises a rich & comprehensive scientific program.

Two giant screens will simultaneously telecast 30+ LIVE advanced robotic/lap surgeries over 3 days, performed by the world’s very best surgeons.

A third giant screen will simultaneously showcase 25 SEMI-LIVE complex & uncommon surgeries, presented by the actual surgeons.

Using headphones, each delegate can effortlessly switch between the 3 screens in real-time, each with its own designated moderators, allowing live Q&A. Pro-con “Fireworks” debates will feature the world’s best urology thought leaders.

Finally, CILRAI 2024 introduces cutting-edge AI innovations with application in your personal daily practice.

Advanced, challenging Live surgeries are the beating-heart of CILRAI, such as Robotic kidney transplantation/auto-transplantation; Bladder transplantation; Complex partial nephrectomies; Level 3 IVC tumor thrombectomy; Inferior vena-cavectomy; prosthetic graft replacement of IVC; Radical nephrectomy with enbloc distal pancreatectomy/splenectomy; Post-chemo RPLND; Radical/salvage prostatectomy; Buccal mucosa ureteroplasty; Urethral pull-through with V-Y plasty for recurrent bladder neck contracture; Single-port robotics; and Flexible robotics.

The goal of CILRAI is to strongly advance your personal robotic/lap skills & horizons.

This 20th running of CILRAI will be our very best yet!

Consider bringing your family with you to Roma, the eternal city, where it all started 20 years ago!

We are expecting our largest-ever attendance - over 1,000 urologists from over 30 countries..

CILRAI 2024 will indeed be magical – the “Super Bowl of Surgery” – the world’s best live surgery meeting in the field of urology! The future is here! Come join us...!

Debiopharm - Is a privately-owned, Swiss biopharmaceutical company aiming to develop innovative therapies that target high unmet medical needs in oncology and bacterial infections. Our unique business model involves the identification of high-potential compounds and technologies for in-licensing, clinically demonstrating their safety and efficacy, and then selecting global and regional pharmaceutical commercialization partners to maximize patient access. Our growing oncology and infectious disease pipeline includes DNA Damage Response inhibitors, antibody-drug conjugates, long-acting formulations, radioligand therapy and a new class of pathogen specific antibiotics.

Intuitive - (Nasdaq: ISRG), headquartered in Sunnyvale, California, is a global technology leader in minimally invasive care and pioneer of robotic-assisted surgery.

Intuitive brings more than two decades of leadership in robotic-assisted surgical technology and solutions to its offerings, and develops, manufactures, and markets the da Vinci surgical system and the Ion endoluminal system.

Intuitive Surgical Sàrl, located in Switzerland, is an affiliate of Intuitive Surgical, Inc.

The company's da Vinci surgical system was the first robotic-assisted minimally invasive surgical system to be cleared in the United States and is available in more than 69 countries. www.intuitive.com/en-gb

Grena Ltd - An innovative manufacturer of medical devices, committed to enhancing patient safety and user comfort. Our collaboration with Key Opinion Leaders ensures the reliability of our products.

Grena Ltd offers:

- Polymer Click'aV Plus™ Ligating Clips and Appliers
- Titanium LigaV® and Vclip® Ligating Clips and Appliers
- Disposable Endoscopic Instruments
- Disposable Wound Protectors Retractors
- 4SEAL® Hemostatic Powder
- NE'X GLUE® Surgical Adhesive

We continuously improve and extend the range of our products to meet the high standards of world-class medical professionals.

Ipsen - Is a biopharmaceutical company focused on developing innovative solutions in oncology, rare diseases and neuroscience.

With sales of more than 3 billion in 2023, Ipsen has a commercial presence in more than 100 countries.

Alongside its external innovation strategy, the company's R&D is based on the use of differentiated innovative technology platforms found within major biotechnology and life sciences centers.

The Group employs about 5,400 people globally and is listed on the Paris Stock Exchange (Euronext: IPN) and in the U.S. through a Sponsored Level I American Depositary Receipt program (ADR: IPSEY).

Lexion - Is a comprehensive pneumo-management, smoke evacuation, and CO2 conditioning system for laparoscopic and robotic procedures. Our system provides enhanced visibility, stable pneumoperitoneum, improved safety, clinical benefits, and cost savings. The LEXION system comprises of one-way, real-time intelligent insufflator, the AP 50/30, CO2 conditioning tubing & trocar, the InsuflowPort®, and closed-loop, active smoke eliminator, the PneuView® XE, to create the optimal surgical insufflation environment.

MedBot - Toumai® is the first fully in-house developed Chinese laparoscopic surgical robot obtained with CE Mark approval. It can make the surgery easier, safer and less-invasive by providing 3D high-definition stereo vision and various highly-flexible wrist-moved surgical instruments and smooth master-slave controlling.

Toumai® has established its pioneering position in the industry through the advanced achievements in robotic surgical technology, clinical applications, and the exploration of Tele-surgery. Toumai® has been successfully applied in large scale to perform high-difficulty and complex surgeries across multi-departments, including Urology, General Surgery, Gynecology, Thoracic Surgery, and Pediatric Surgery. Among them, over 200 cases are Tele-surgery cases.

Merck - A leading science and technology company, operates across life science, healthcare and electronics. Around 63,000 employees work to make a positive difference to millions of people's lives every day by creating more joyful and sustainable ways to live. From providing products and services that accelerate drug development and manufacturing as well as discovering unique ways to treat the most challenging diseases to enabling the intelligence of devices – the company is everywhere. In 2023, Merck generated sales of 21 billion in 65 countries.

Movi - A historic presence on the market, distributes imported and own-brand medical devices at a national level, from electromedical devices to single-use products, medical equipment for the home care of elderly and disabled patients.

The Group is the link between top international industrial manufacturers of medical devices and end users, supporting excellence and promoting revolutionary diagnostic-therapeutic innovations.
